

# Neat beneath your feet

**CWS Dust Control Mats**

**CWS**

# Always one step ahead

Did you know, for example, that around 20 per cent of all notifiable accidents in the workplace are a result of tripping, slipping and falling? The right mats can help you avoid such accidents. Something similar is true of dirt in your building: around 70 – 80 per cent of the dirt inside buildings can be traced back to dust and moisture brought in by visitors

from outside. The right mats can help to cut your cleaning costs sustainably – not to mention how well they protect expensive floors and can prolong the time until the next renovation is necessary. And another thing: customised mats in the entrance area function as a business card – they let your company shine.

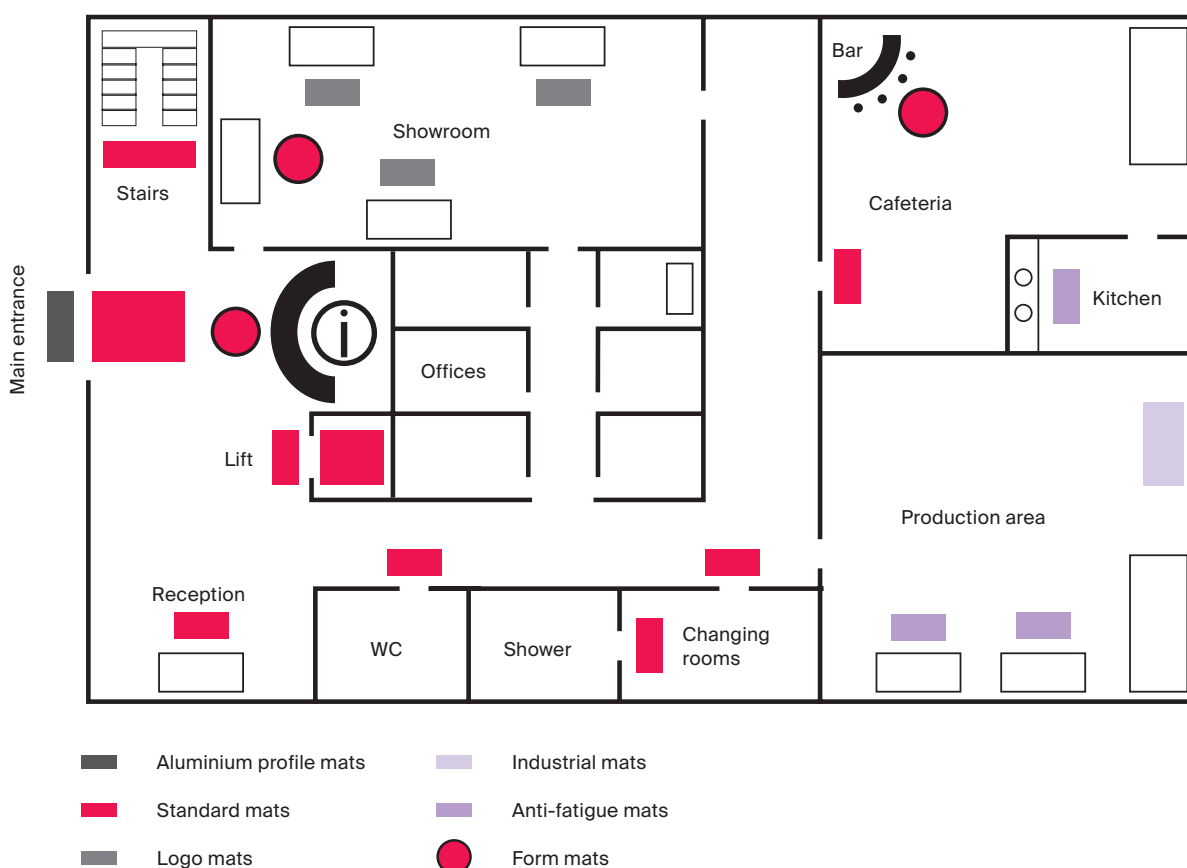

# In the right place

Entrances are every building's business card. They make a lasting first impression on guests when visiting your company. With CWS dust control solutions, you are letting your customers and guests know right from the entrance that they are in good hands. Whatever the format – standard, round, rectangular or customised – CWS dust control mats emphasise your company's unique image.

In transition areas, between production and office areas, in front of and in lifts, at escalators, at coffee

machines, in the cafeteria, in the delivery area or in access or departure areas, CWS dust control mats stop dirt, moisture and dust, prevent slipping, protect valuable floors and promote a neat and tidy image.

Last but not least, CWS dust control mats help to lower your cleaning costs. Studies show: effective dust control solutions can cut the costs of floor cleaning by up to 70%.\* Cleanliness that pays off.

# High-tech for your floors

The special high-twist nylon pile of the CWS dust control mats ensures effective cleanliness. Dirt and moisture are quickly "brushed off" shoe soles and absorbed by the mats. Each square metre can absorb up to 4.8 l of dirt and moisture. The dirt is

retained on the rubber base inside the mat, the moisture evaporates. Regular changing and cleaning of the mats secures optimal functionality and a high-quality appearance.

Our products are backed up by systematic solutions. For us, a professional service means: collecting, exchanging, washing, drying, repairing, quality control and delivery. Comprehensive consultation is also a part of our rental service packet. Exact, on-site situation analyses and detailed product advice result in customised service solutions.

We rent our mats with a service contract included. In consultation with our customers, we schedule the exchange and washing of the mats.

The service cycle for CWS dust control mats means that cleanliness is a given for our customers. Regular washing and professional care of the mats means they can be used time and time again to take up daily dirt and moisture. All CWS mats are processed in specialised laundry facilities. Certified laundry processes are gentle on the environment and ensure lasting cleanliness.

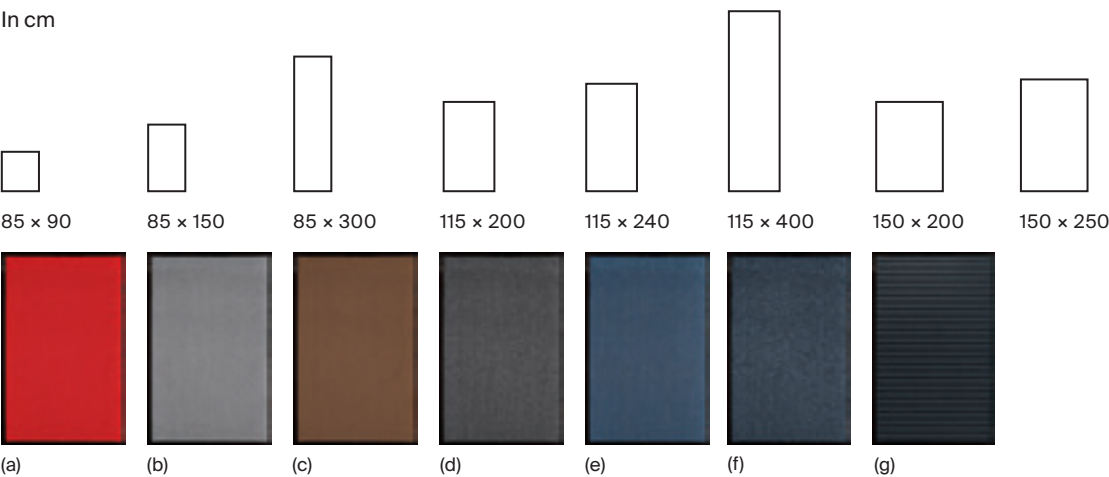

# Moisture and dirt under control

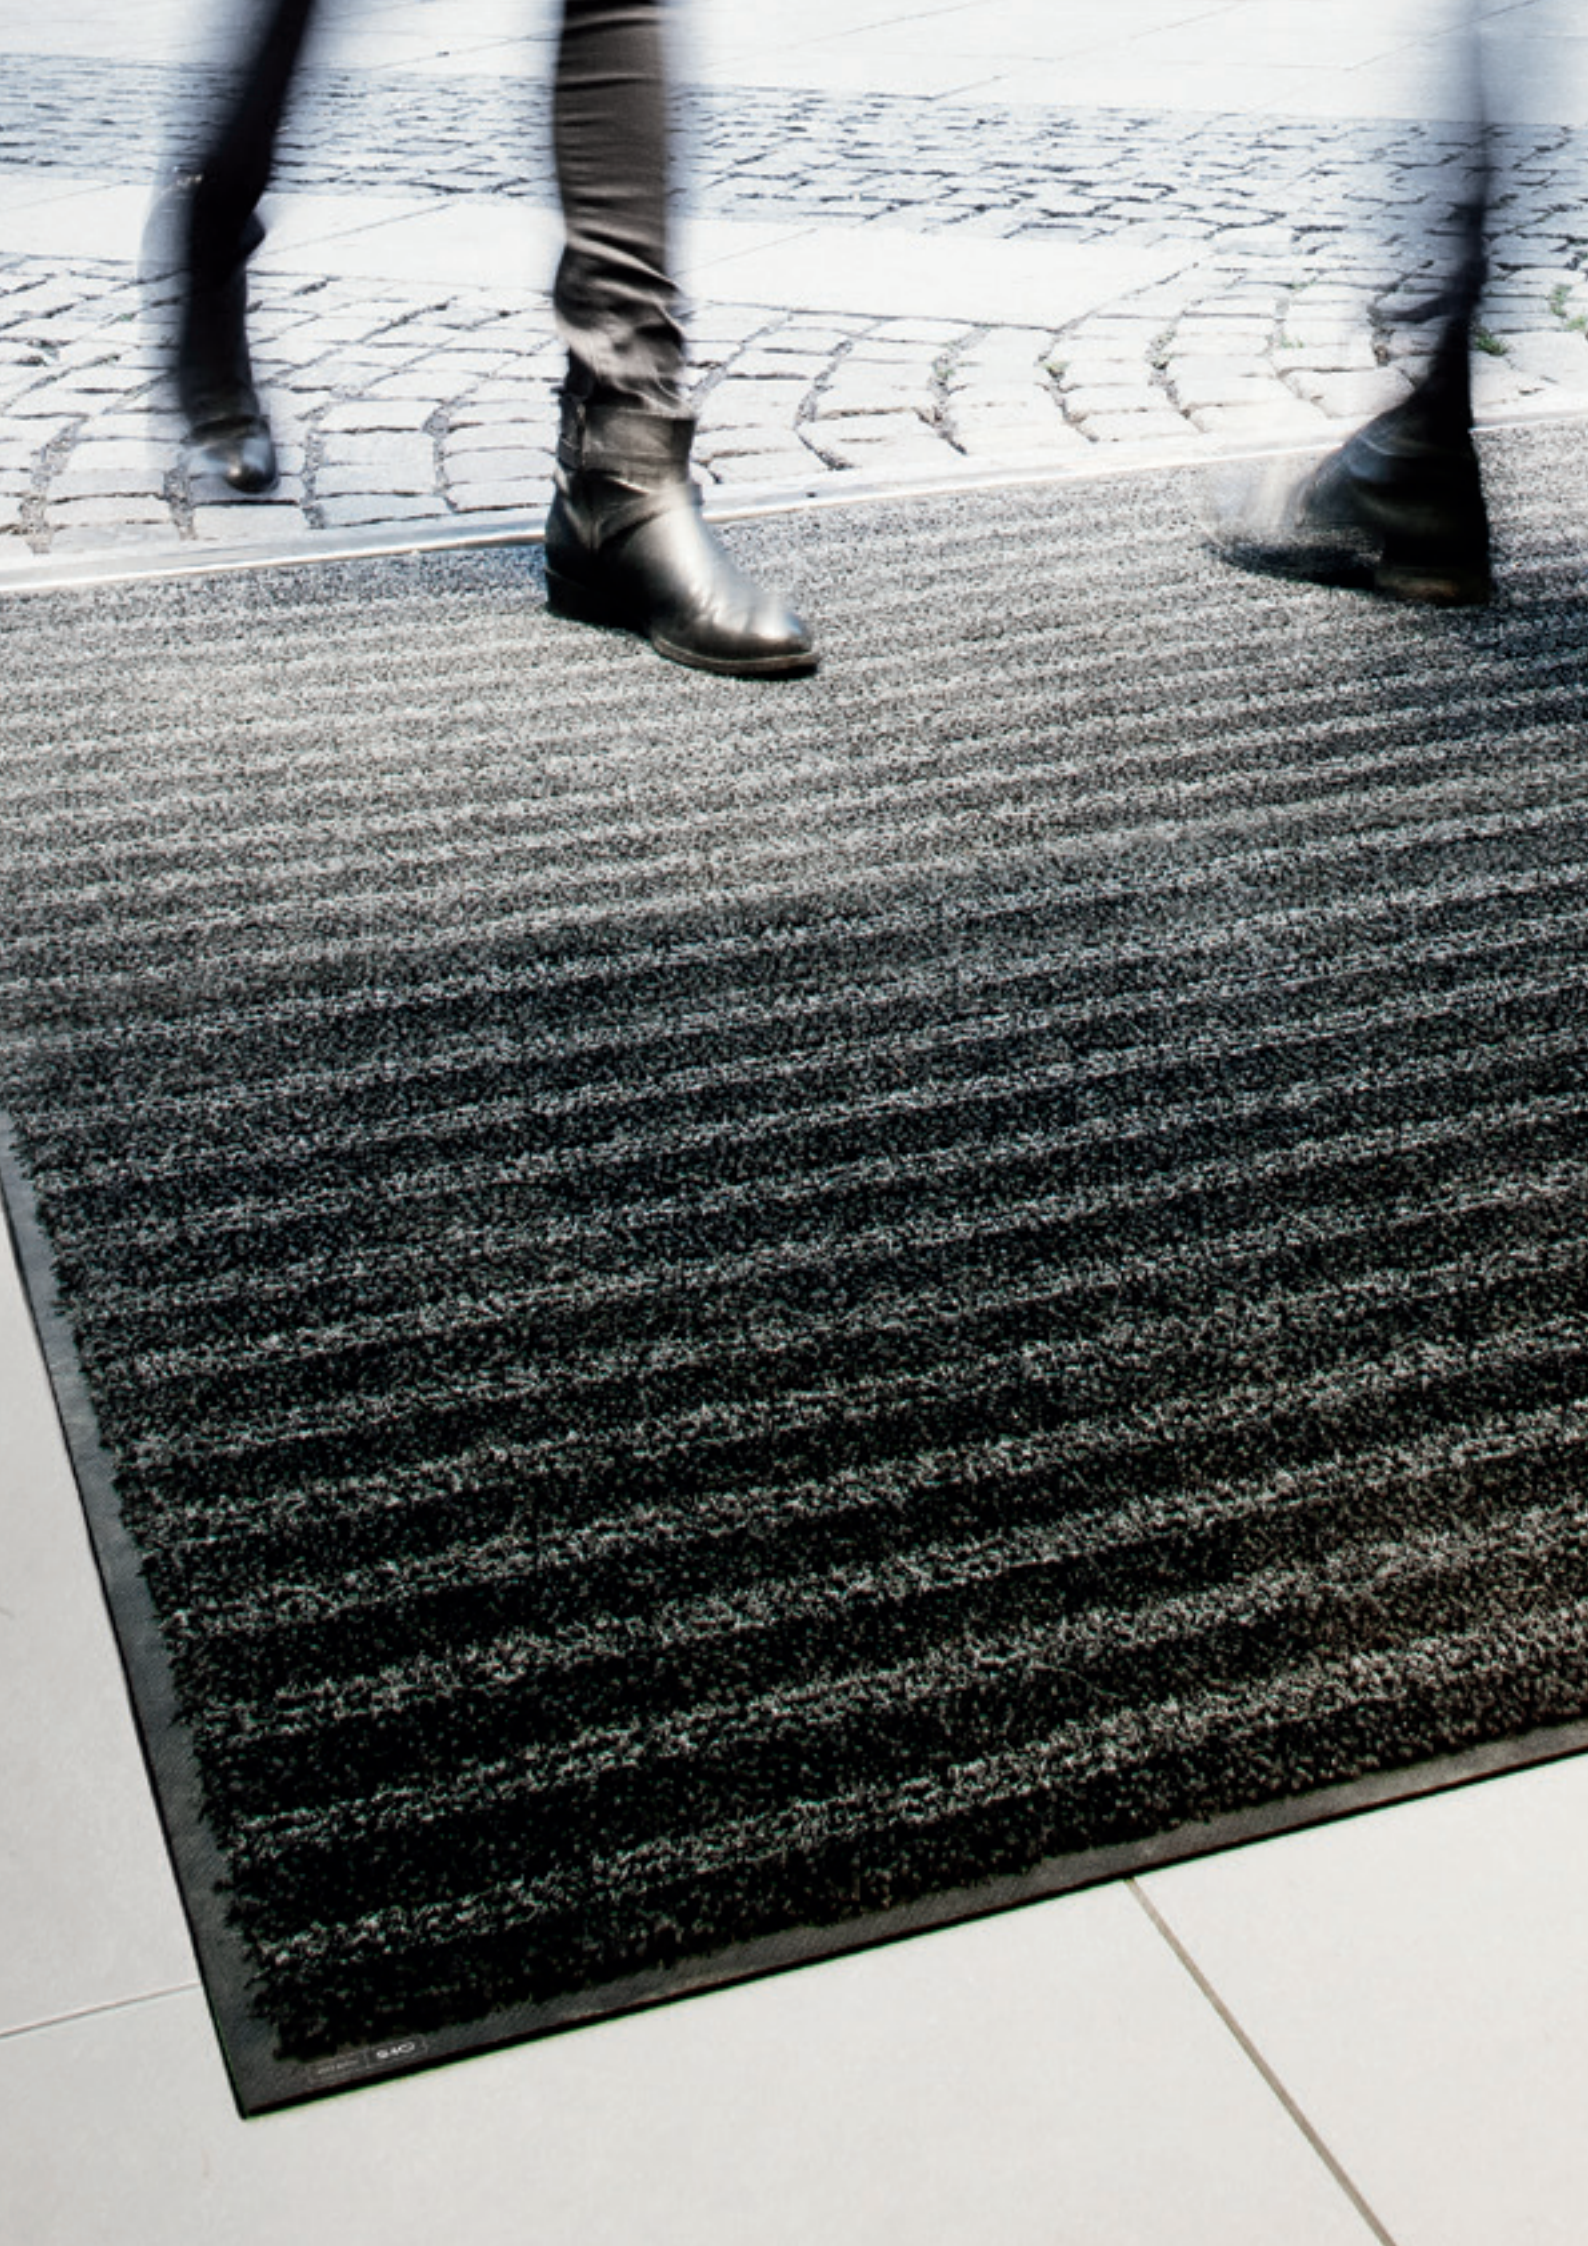

A special high-twist nylon pile makes CWS mats especially suitable for absorbing fine dirt and moisture. The mats with a scraper surface finish make an ideal barrier against coarse dirt in roofed entrance

areas. There are a variety of sizes and designs available to choose from. The selection of standard sizes and designs listed below represents the “classic” CWS dirt trapping solutions.

Product	Name	Available standard sizes (in cm)
a	Red	85 x 150 (8861200)   85 x 300 (8863200)   115 x 200 (8862200)
b	Grey	85 x 150 (8811000)   115 x 200 (8812000)
c	Brown	85 x 150 (903200356)   150 x 200 (903200158)
d	Grey Sparkling	85 x 90 (8835200)   85 x 150 (8831000) 85 x 300 (8834200)   115 x 200 (8832000) 115 x 240 (8836200)   115 x 400 (8838200) 150 x 200 (8833200)   150 x 250 (8837200)
e	Blue/Brown Sparkling	85 x 150 (8821000)   115 x 200 (8822000)
f	Scraper	85 x 150 (8851000)   115 x 200 (8852000)
g	Scraper Plus	115 x 200 (8071100)   150 x 200 (8072100)

# A strong combination

CWS Scraper Plus mats reliably stop dust, dirt and moisture; they protect floors and, with their attractive striped pattern, ensure a high-quality appearance. This special mat in the standard CWS range combines a firm scraper material, which brushes coarse dirt off shoes, with a soft and high-twist

nylon pile to deal with fine dirt and moisture. Due to its high absorbency, the mat is particularly suitable for entrances, passageways and delivery points. The CWS Scraper Plus mat can absorb up to 4.8 litres of wet and dry dirt per square metre, making it one of the most absorbent types of mat.

# Dynamic cleanliness

Dirt is brought into buildings – in access and transfer areas – either as a result of delivery vehicles or transport operations between production halls. CWS industrial mats ensure better cleanliness. Three types of mats are available which are able to absorb a great deal of dirt and moisture directly in entrance areas and withstand the effects of vehicles.

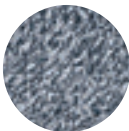

Three to six mats placed one after the other form a so-called industrial lock. They are fastened to the floor with a sturdy anchoring system using rubber

expanders under the mat. If unexpected braking manoeuvres occur while travelling over the mats, resulting in slippage of the mats, the flexible rubber clamps pull the mats back into their original positions, time and time again.

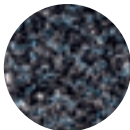

The mats are installed by CWS and are collected from the customer weekly or fortnightly for professional cleaning, depending on the agreed service frequency. In this way, we ensure that CWS industrial mats remain functional and retain their full dirt- and moisture-absorbing potential.

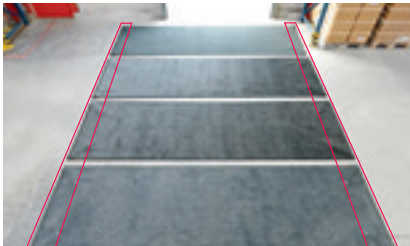

Scraper material

Cotton

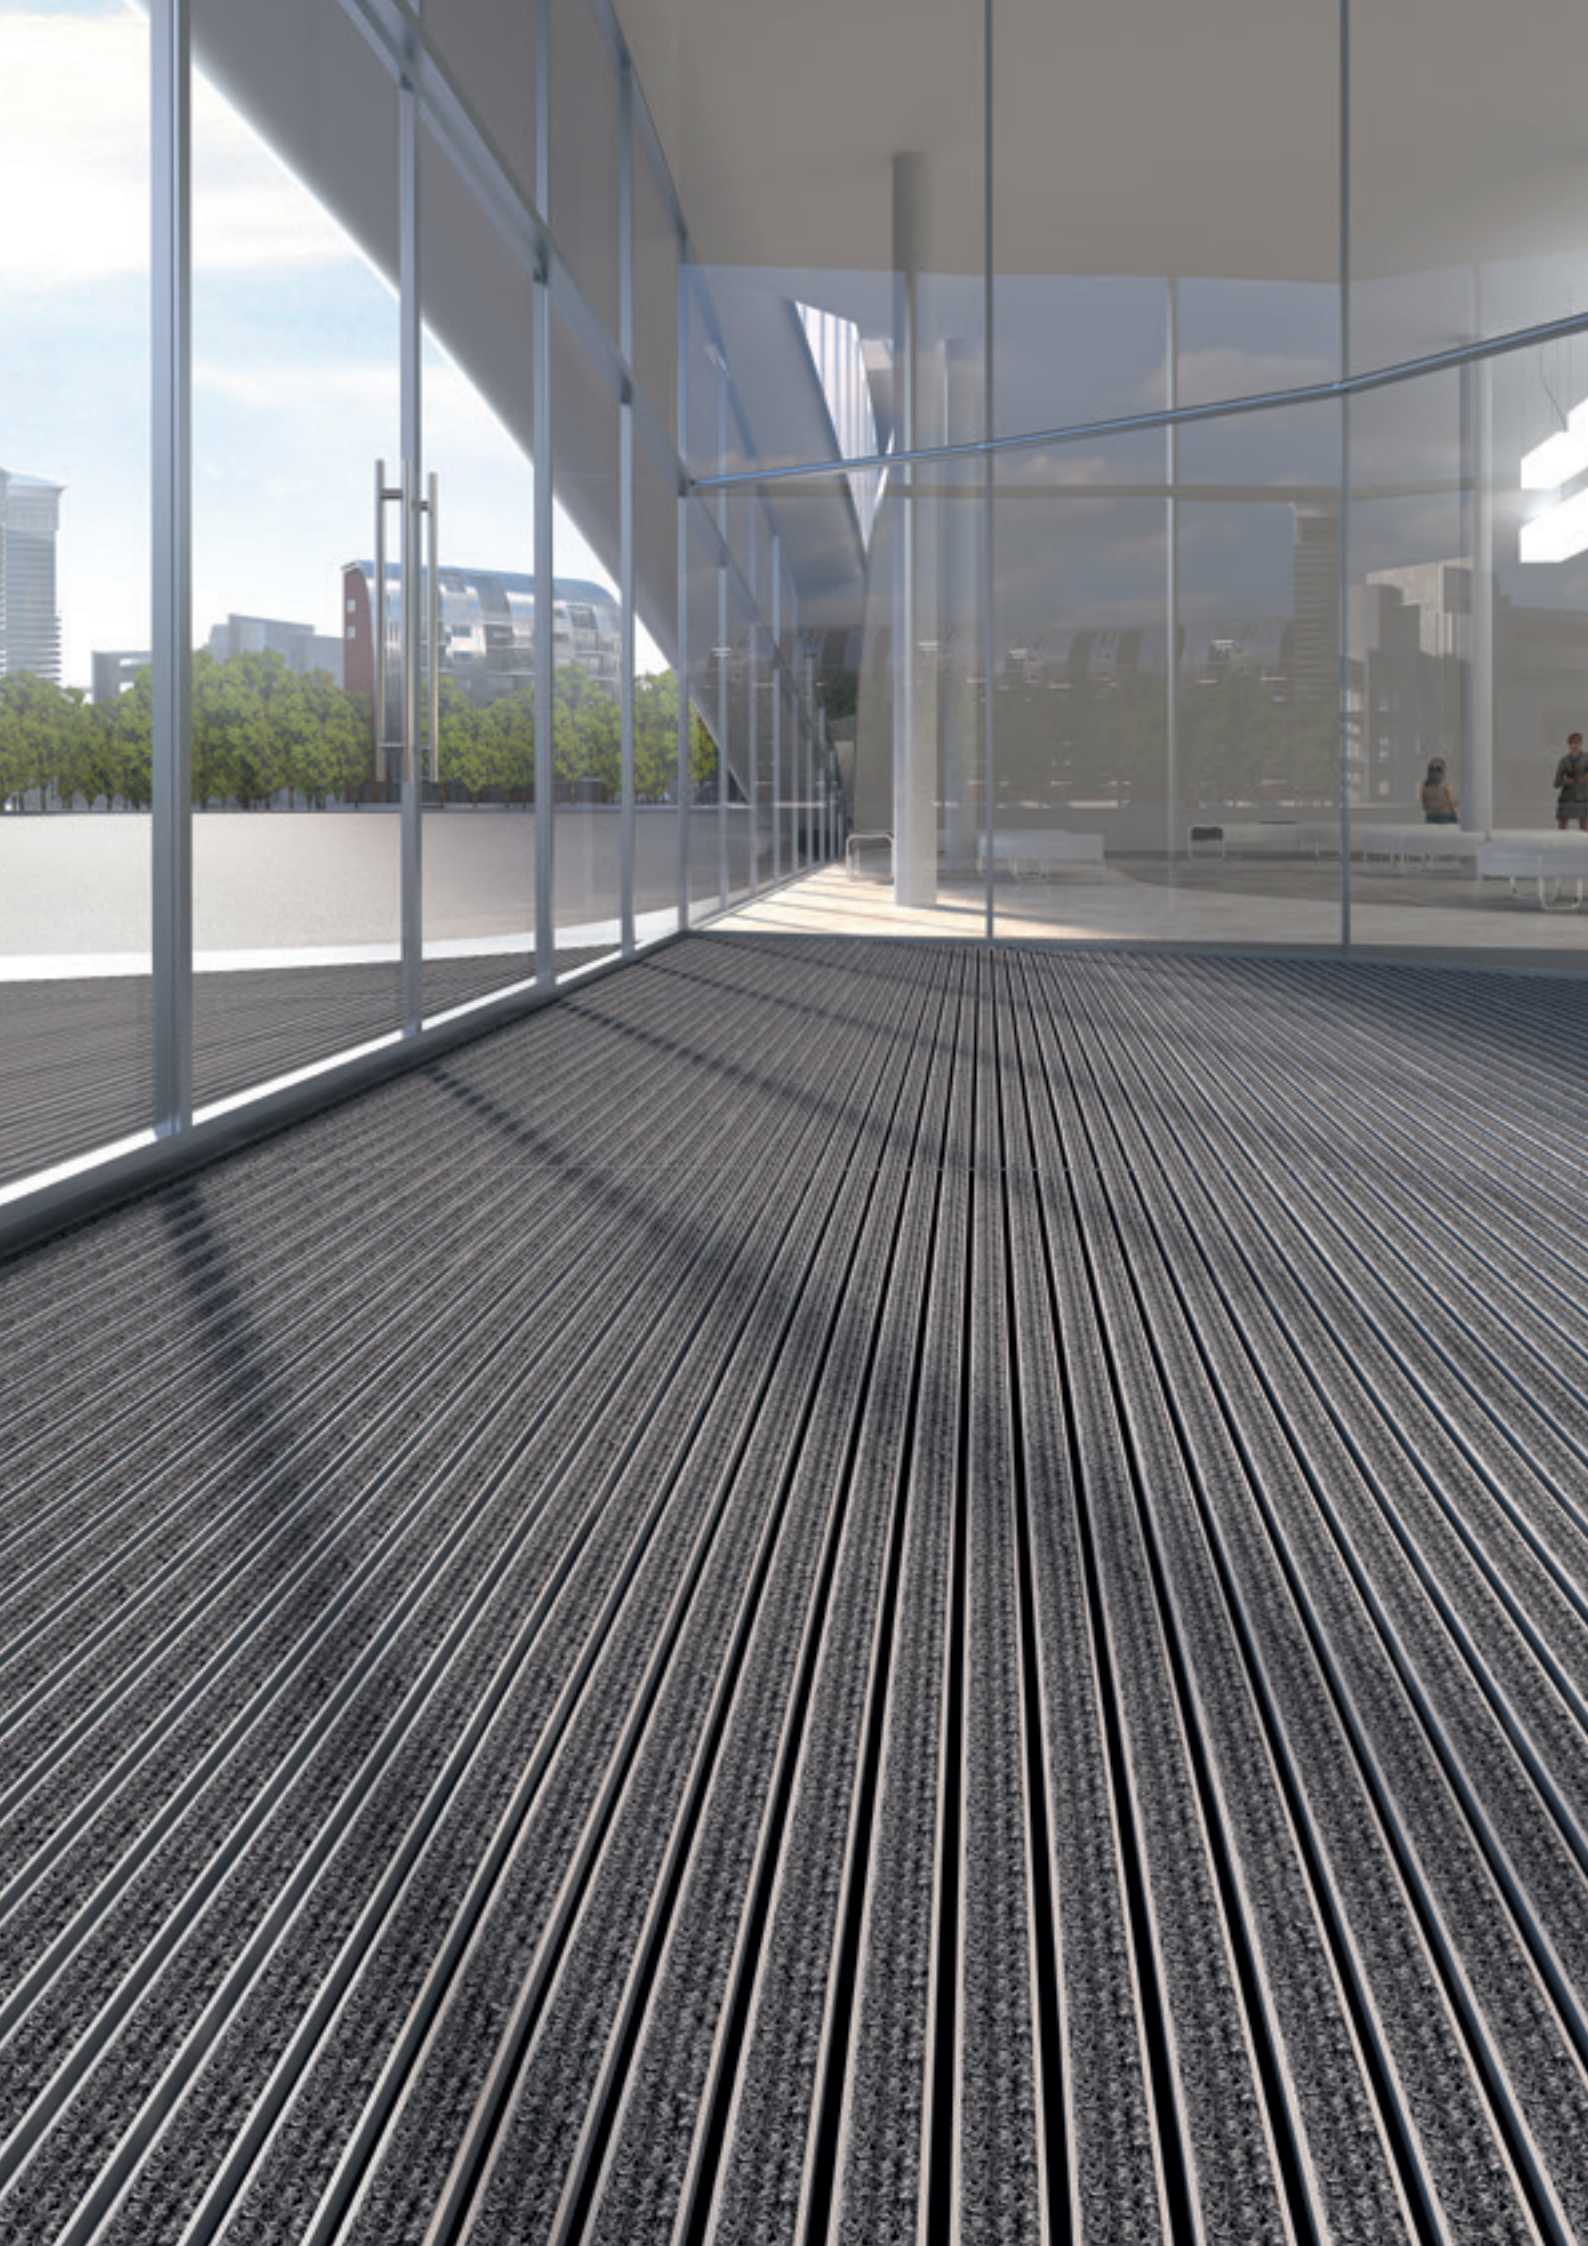

High-twist nylon

Features
Three surfaces to choose from (scraper material, high-twist nylon, cotton)
Width 115 cm, length up to max. 4 m
Suitable for use in areas with moving objects
Four vulcanised rubber eyelets
Fixation to the floor using rubber expanders
Rental service for cleaning and exchanging

Wide traffic area (excl. anchoring area) retains dirt and moisture.

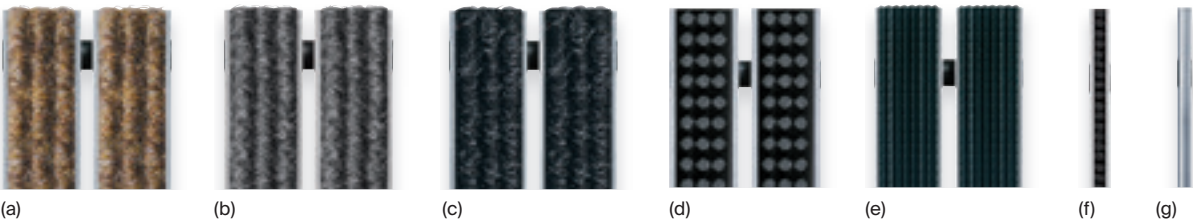

# Firmly anchored cleanliness

Aluminium profile mats are elegant and sturdy. They offer a professional solution for both indoor and outdoor areas. The high-quality aluminium frame systems come in a variety of heights and aluminium profile widths depending on visitor

frequency and demands. The five insert types can be individually combined and come in different colours. The open system ensures that dirt and moisture which is brushed off shoes remains between the profiles and is not carried inside.

Product	Material	Colour
a	Coarse fibre carpet ribs	Beige
b	Coarse fibre carpet ribs	Grey
c	Coarse fibre carpet ribs	Anthracite
d	Cassette brush	Anthracite
e	Rubber insert	Black
f	Brush strip (only in combination with an insert)	Anthracite
g	Aluminium scrap-off edge (only in combination with an insert)	Silver

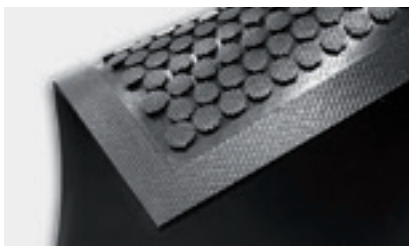

# Total relaxation

The anti-fatigue mat is a medically tested specialised product which reacts to minimal body movements and helps remove the stress of standing. The strain is taken off back and leg muscles – an effect beneficial to health which has been tested and approved by the American Podiatric Medical Association APMA.

The anti-fatigue mat made of 100% nitrile rubber is suitable for all areas in which employees are required to stand for long periods of time, such as in hotels and restaurants, airports, petrol stations, manufacturing or industrial environments, banks and shops.

## Unique cushioning functions:

- Gentle on the joints
- Stimulates blood circulation
- Reduces fatigue and loss of performance
- Alleviates discomfort in the lower back and leg muscles

## Features

Gentle on joints

Overall thickness of 8.5 mm, insulated against cold floors

Easy cleaning
